

David A. Knowles

email: daknowles@nygenome.org

URL: <https://daklab.github.io/>

Positions held

- 2019-
CORE FACULTY MEMBER
New York Genome Center
- 2019-
ASSISTANT PROFESSOR (Computer Science)
AFFILIATE MEMBER (Data Science Institute)
INTERDISCIPLINARY APPOINTEE (Systems Biology)
Columbia University
- 2014-2018
POSTDOCTORAL RESEARCHER (Genetics, Pathology)
Stanford University
Co-advisors: Prof. Jonathan Pritchard, Prof. Sylvia Plevritis
- 2012-2014
POSTDOCTORAL RESEARCHER (Computer Science)
Stanford University
Advisor: Prof. Daphne Koller
- 2008-2012
PHD Candidate, Roger Needham Scholar, Wolfson College, University of Cambridge
Machine Learning Group, Cambridge University Engineering Department
- 2006
Summer Undergraduate Research Fellow
California Institute of Technology

Education

- 2008-2012
PHD Engineering (Machine Learning)
University of Cambridge
Thesis: *Bayesian non-parametric models and inference for sparse and hierarchical latent structure*
Advisor: Prof. Zoubin Ghahramani
- 2007-2008
MSc Bioinformatics and Systems Biology - Distinction
Imperial College London
Thesis: *Statistical tools for ultra-deep pyrosequencing of fast evolving viruses.*
Thesis advisor: Prof. Susan Holmes, Statistics Department, Stanford University.
- 2003-2007
MENG Engineering - Distinction
Thesis: *A non-parametric extension to Independent Components Analysis.*
Thesis advisor: Prof. Zoubin Ghahramani.
BA Natural Sciences (Physics) - First Class
University of Cambridge

Honours & Awards

- 2017 Stanford Cancer Systems Biology Symposium – Poster Award
- 2014 The International Society for Bayesian Statistics Travel Award for best invited Bayesian paper
- 2014 The International Society for Bayesian Statistics Dennis V. Lindley Prize for innovative research in Bayesian Statistics
- 2007 Charles Lamb University prize for first place in Information Engineering
Sir Joseph Larmor Silver Plate for *undergraduates adjudged to be the most worthy for intellectual qualifications or moral conduct and practical activities*
Three other college prizes (Cargill, Cunningham and College)
- 2005 Wright Prize for ranking 5/600 in Natural Sciences
Earle Year Prize for top 4 students across all subjects at St. John’s College
Hollinshead-Howles Prize for top Natural Scientist at St. John’s College
BP Prize for Advanced Physics
- 2004 Gaskell Year Prize for ranking 9/600 in Natural Sciences
Hollinshead-Howles Prize for Part IA
- 2003 Top 50 nationally in Royal Society of Chemistry Olympiad
- 2001 Top 50 nationally in Mathematics Olympiad

Fellowships

- 2008-2012 Roger Needham Scholar, *Wolfson College, University of Cambridge*, funded by Microsoft Research
- 2006 Summer Undergraduate Research Fellow, *California Institute of Technology*

Industry Positions

- 2009-2012 Contract Software Engineer
Microsoft Research Cambridge
Extending Infer.NET.
- 2009 Research Intern
Microsoft Research Cambridge
Non-conjugate Variational Message Passing. Supervisor: Thomas P. Minka.
- 2005 Equity Research Intern
UBS Investment Bank, London
Developed a financial model of Belgacom Telecom.
- 2004 Software Engineering Intern
Data Connection Limited, London
Developed an automatic build system using Unix shell scripts.

Teaching & Mentoring

- 2019 COMS4995 Machine learning in functional genomics
- 2019 Columbia University Functional Genetics Boot Camp
- 2019 Weill Cornell Medical College Computational Genomics
- 2017 CBI0 244: Lecture Series in Cancer Systems Biology
- 2013- Statistical, Mathematical, and Computational Consulting (SMACC) hosted by Stanford ICME

2013 Advising five groups of students for graduate machine learning (CS229) course projects
 2013 Advised undergraduate student for CURIS Undergraduate Research Internship
 2013 Stanford Statistics guest lecture on Bayesian nonparametrics
 2009-2011 Statistics advisor, Cambridge University Statistics Clinic
 2009-2011 Supervisor, Cambridge University Engineering Department, *Digital Signal Processing*
 2009-2011 Demonstrator, Cambridge University Engineering Department, *C++ programming*
 2007-2009 Private Mathematics tutor, Camtutors

Reviewing & Service

2017 Advances in Neural Information Processing Systems (NIPS) Best Reviewer Award

JOURNALS

Cell, Nature Genetics, Machine Learning, PLOS Genetics, PLOS Computational Biology, Bioinformatics, Genome Research, Journal of the American Statistical Association, Statistics and Computing (Springer), Bayesian Analysis, Journal of Mathematical Biology, Journal of Machine Learning Research, Journal of Computational and Graphical Statistics, Journal of the Royal Statistical Society: Series B, IEEE Transactions on Pattern Analysis and Machine Intelligence, Annals of Applied Statistics

CONFERENCES

Advances in Neural Information Processing Systems (NeurIPS), International Conference on Machine Learning (ICML), International Conference on Artificial Intelligence and Statistics (AISTATS), Pacific Biocomputing Symposium (PBS), International Joint Conferences on Artificial Intelligence (IJCAI),

WORKSHOPS

PC member for NIPS Workshop on Computational Biology, PC member for NIPS Workshop on Optimization in Machine Learning

PROFESSIONAL AFFILIATIONS

Organizer for the Machine Learning in Computational Biology meeting 2019, ISMB MLCSB COSI member, Early Stage Investigators in Cancer Systems Biology Steering Committee, International Society of Bayesian Analysis (ISBA) Chair of the Continuing Education Committee

Selected Talks

2019 WashU Department of Genetics invited speaker
 2019 NYC Human Genetics meeting
 2019 UCLA Computational Genomics Summer Institute
 2018 UCLA Computational Genomics Winter Institute
 2017 American Society of Human Genetics Annual Meeting
 2017 Statistical and Computational Challenges in Large Scale Molecular Biology at the Banff International Research Station
 2015 Highlights from Bayesian Analysis (Joint Statistical Meeting session), invited speaker
 2015 Statistical and Computational Challenges In Bridging Functional Genomics, Epigenomics, Molecular QTLs, and Disease Genetics at the Banff International Research Station

2015 The Biology of Genomes meeting at Cold Spring Harbor Laboratory
 2014 NIPS Variational Inference Workshop (invited speaker)
 2013 RECOMB/ISCB Conference on Regulatory & Systems Genomics
 2012 Stanford Biostatistics Workshop
 2012 Collegio Carlo Alberto Statistics Seminar
 2011 Cambridge Statistics Initiative One Day Special Meeting
 2011 27th Conference on Uncertainty in Artificial Intelligence (UAI)
 2011 NIPS Workshop on Predictive Models in Personalized Medicine
 2011 Eighth Workshop on Bayesian Nonparametrics; Veracruz, Mexico
 2009 NIPS Workshop on Computational Biology

Highlighted research

Using allelic specific expression to detect GxE interaction effects. Detecting gene-by-environment (GxE) effects on the transcriptome is challenging in observational data. I developed a computational method, EAGLE, which leverages allele-specific expression as a controlled, within individual test of the influence of environment factors on different genetic backgrounds. Code is available at <https://github.com/davidknowles/eagle>.

DOI: [10.1038/nmeth.4298](https://doi.org/10.1038/nmeth.4298).

Doxorubicin response QTL mapping and implications for anthracycline-cardiotoxicity (ACT). ACT is a common side-effect of chemotherapy, but its genetic basis and molecular mechanism remain unclear. We measured transcriptomic and cellular damage response to doxorubicin in a panel of iPSC-derived cardiomyocytes from 45 individuals. Using a novel, efficient linear mixed model, *suez*, we identified hundreds of loci that interact with ACT response. These response-QTLs are significantly enriched in ACT GWAS.

Serie, Nadine Norton, Carole Ober, Jonathan K Pritchard, and Yoav Gilad. “Determining the genetic basis of anthracycline-cardiotoxicity by molecular response QTL mapping in induced cardiomyocytes”. *eLife* (2018). DOI: <https://doi.org/10.7554/eLife.33480>. *These authors contributed equally to this work.

Quantifying splicing variation through intron-excision events. We developed LeafCutter to identify, quantify and test variable intron splicing events, obviating the need for accurate transcript annotations and circumventing the challenges in estimating relative isoform abundance. A paper describing the method has been accepted at *Nature Genetics*[3], an early version of LeafCutter was used in our study linking complex disease and splicing[4], and we actively maintain code at <https://github.com/davidknowles/leafcutter>.
