email: tony.dear@columbia.edu

Employment	Columbia University, Department of Computer Science Senior Lecturer in Computer Science Lecturer in Computer Science	July 2025 - present July 2018 - June 2025
Education	Carnegie Mellon University, The Robotics Institute Doctor of Philosophy, Robotics - Thesis: Extensions of the Principal Fiber Bundle Model for Locomoting Robots Master of Science, Robotics	August 2018 May 2015
	University of California, Berkeley Bachelor of Science, Electrical Engineering and Computer Science (EECS)	May 2012
Teaching	Columbia University COMS 3203, Discrete Mathematics COMS 4701, Artificial Intelligence COMS 4701, Artificial Intelligence COMS 3203, Discrete Mathematics CSOR 4200, Data-Driven Decision Modeling COMS 3203, Discrete Mathematics COMS 4701, Artificial Intelligence COMS 4701, Artificial Intelligence COMS 4733, Computational Aspects of Robotics COMS 3203, Discrete Mathematics COMS 4701, Artificial Intelligence COMS 3251, Computational Linear Algebra CSOR 4200, Data-Driven Decision Modeling COMS 3203, Discrete Mathematics COMS 4701, Artificial Intelligence COMS 4701, Artificial Intelligence COMS 3251, Computational Linear Algebra COMS 4733, Computational Aspects of Robotics COMS 3251, Computational Linear Algebra COMS 4701, Artificial Intelligence COMS 4733, Computational Aspects of Robotics COMS 3251, Computational Linear Algebra COMS 4701, Artificial Intelligence COMS 3251, Computational Linear Algebra COMS 4701, Artificial Intelligence COMS 4733, Computational Aspects of Robotics COMS 3203, Discrete Mathematics COMS 4701, Artificial Intelligence	Fall 2025 Summer 2025 Spring 2025 Fall 2024 Summer 2024 Spring 2024 Fall 2023 Spring 2023 Fall 2022 Summer 2022 Spring 2022 Fall 2021 Summer 2021 Spring 2021 Fall 2020 Spring 2020 Fall 2019 Spring 2019 Fall 2018
	Coursera Decision Making and Reinforcement Learning	Spring 2023 to present
Leadership	Columbia Online Artificial Intelligence Executive Education Program Director CS@CU MS Bridge Program Director	
Grants	National Synthesis Center for Organismal Resilience to Environmental Change (NSCORE) Co-PI serving on the Council on Education & Outreach. This center will build a diverse community of organismal biologists and computer scientists around the globe that will join forces to generate the technical tools and expertise needed to discover, build, share and analyze the recent explosion in cross-disciplinary biological and environmental datasets available to understand and predict organismal responses to environmental change. NSCORE will act as a global hub to attract and educate a new generation of scientists studying organismal responses to environmental change in plants and animals.	2025 - 2030

Collaboratory Fellows Fund

Aug 2020 - Aug 2023

\$100,000 with Prof. Yi Zhang (Columbia IEOR) for the development of an interdisciplinary, data-driven decision-making course. The course covers ideas and examples from artificial intelligence and business analytics to give students a solid foundation in decision theory, dynamic programming, reinforcement learning, and model estimation. Applications include practice with real data sets for business analytics and a capstone project.

Provost's Teaching and Learning Grant for MOOCs

June 2021 - Aug 2022

Support and funding to develop a massive open online course (MOOC) on the subject of *Decision Making and Reinforcement Learning* with Columbia Video Network (CVN). This course teaches sequential decision making and reinforcement learning with an emphasis on theory and algorithms. Assessments include self-check questions, quizzes, and coding implementations.

Research**Columbia University**

August 2018 - present

Collaborators: Prof. Scott David Kelly (University of North Carolina, Charlotte). Geometric mechanics, deep reinforcement learning (RL), and robot locomotion. We are interested in applying ideas from mechanics to simplify the modeling and application of RL to physical robots and systems. Our ultimate goal is to develop algorithms and systems that can effectively learn in real time and in real life.

Carnegie Mellon University

September 2012 - August 2018

Advisor: Prof. Howie Choset. Expanded applicability of geometric methods for modeling and controlling locomoting systems, including wheeled, snake, and swimming robots. We applied intuitive motion planning techniques to systems that deviate from ideal conditions, such as those with passive joints or those that have to coordinate their degrees of freedom with environmental interactions. We also validated the newly established theory through experiments on simple but representative robots, such as a multi-link wheeled snake robot with compliant joints.

University of California, Berkeley

February 2011 - February 2012

Advisor: Prof. Stuart Russell. Developed and tested a seismic inference system in accordance with the Comprehensive Test Ban Treaty Organization (CTBTO) to detect nuclear explosions and seismic events worldwide; first system of its kind to use Bayesian inference. Implemented algorithms and computation through parallel and distributed computing on Amazon EC2, with results of up to 30 times speedup.

Fellowships

National Defense Science and Engineering Graduate (NDSEG) Fellowship
Jim & Donna Gray Endowment Award (UC Berkeley)

2014 - 2017
2011 - 2012

Service

Helped organize the inaugural Columbia Undergraduate Computer and Data Science Research Fair in Fall 2022

Advisor for Columbia undergraduate student groups, including Application Development Initiative (ADI) Labs and Columbia Space Robotics, as well as undergraduate and MS students on independent research projects

Reviewer for refereed journals, including MDPI Robotics, IEEE T-ASE, and NODY, and refereed conferences, including ICRA, IROS, CDC, ACC, DSCC, among others.

Mentor for undergraduate students (including international) participating in the Robotics Institute Summer Scholars (RISS) program to perform research in the laboratory.
