COLUMBIA UNIVERSITY
IN THE CITY OF NEW YORK

Academic Appointments

Columbia University *2025 - Present*
Department of Computer Science
Assistant Professor

Massachusetts Institute of Technology *2024 - 2025*
Department of Electrical Engineering and Computer Science
Postdoctoral Associate

Education

University of Toronto *2019 - 2024*
PhD in Computer Science | *Supervised by Prof. Alec Jacobson*

University of Oviedo *2014 - 2019*
BSc in Mathematics and BSc in Physics

Awards

Dimitris N. Chorafas Prize *2025*
Dimitris N. Chorafas Foundation | *10,000 USD*

SGP Software Award: Gpytoolbox *2025*
Eurographics Symposium on Geometry Processing (with: Prof. Oded Stein) | *1,000 EUR*

Alain Fournier Outstanding Doctoral Dissertation Award *2025*
Canadian Human-Computer Communications Society | *3,000 CAD*

Eurographics PhD Thesis Award *2025*
Eurographics | *London, United Kingdom*

MIT Postdoctoral Fellowship for Engineering Excellence *2024-2025*
MIT School of Engineering | *75,000 USD*

DiDi Graduate Student Award in Computer Science *2024*
University of Toronto Department of Computer Science | *10,000 CAD*

Vanier Canada Doctoral Scholarship *2021-2024*
Natural Sciences and Engineering Research Council of Canada (NSERC) | *150,000 CAD*
Awarded to 166 graduate students across all of Canada and all academic disciplines.

Connaught International Scholarship for Doctoral Students *2019 - 2024*
University of Toronto School of Graduate Studies | *50,000 CAD*

EECS Rising Stars *2023*
Academic Career Workshop in EECS | *Travel Funding*

HLF Ernst Abbe Grant *2023*
Heidelberg Laureate Forum | *Travel Funding*

Beatrice "Trixie" Worsley Graduate Scholarship in Computer Science *2021, 2023*
University of Toronto Department of Computer Science | *8,000 CAD*
Awarded to a student who has taken an active role in promoting women in Computer Science.

Adobe PhD Fellowship *2022*
Adobe Inc. | *10,000 USD*

Dean's Doctoral Excellence Scholarship *2021*
University of Toronto Faculty of Arts & Science | *25,000 CAD*
Awarded to a single doctoral student across all the University of Toronto Faculty of Arts & Science disciplines.

Adobe Research Fellowship *2020 - 2021*
Adobe Inc. | *Honorable mention*

50th Anniversary Graduate Scholarship *2020*
University of Toronto Department of Computer Science | *2,000 CAD*

Graduate Program Award *2019 - 2020*
University of Toronto Department of Computer Science | *10,000 CAD*

Recognition of Excellence Award *2019 - 2020*
University of Toronto Department of Computer Science | *10,000 CAD*

Adobe Women in Technology Scholarship *2019*
Adobe Inc. | *Honorable Mention*

SenseTime Fellowship *2019*
MIT | *Granted but declined*

Scholarship for Academic Excellence *2014 - 2019*
María Cristina Masaveu Peterson Foundation | *50,000 EUR*

Research Funding

Research Support *2025*
BRAID | *Donation*

Supported Research Project *2025-2026*
Columbia-Dream Sports AI Innovation Center | *99,471 USD*
Co-PI: Prof. Steven Feiner

Interdisciplinary Research Seed Funding (SIRS) *2025-2026*
Columbia Fu Foundation School of Engineering | *85,000 USD*
Co-PI: Prof. Hod Lipson

Research Support *2024*
nTop | *Donation*

Research Support *2025*
Adobe | *Donation*

Students and Postdocs

Ningna Wang *2025 - Present*
Postdoctoral Research Scientist at Columbia University

Xiana Carrera Alonso *2025 - Present*
PhD Student at Columbia University

Hyunwoo (Brian) Kim *2025 - Present*
PhD Student at Columbia University

Daria Nogina *2025 - Present*
PhD Student at Columbia University

Publications

Tube Maps: Fast SPH Boundary Handling in Tubular Coordinates
Daria Nogina, **Silvia Sellán**
Conditionally accepted to SIGGRAPH 2026

Dual Contouring of Signed Distance Data
Xiana Carrera, Ningna Wang, Christopher Batty, Oded Stein, **Silvia Sellán**
Conditionally accepted to SIGGRAPH 2026

A Bayesian Approach for Task-Specific Next-Best-View Selection with Uncertain Geometry
Jingsen Zhu, **Silvia Sellán**, Alexander Terenin
Conditionally accepted to SIGGRAPH 2026

Stochastic Poisson Surface Reconstruction with One Solve using Geometric Gaussian Processes
Sidhanth Holalkere, David Bindel, **Silvia Sellán**, Alexander Terenin
ICML 2025

Variational Elastodynamic Simulation
Leticia Mattos Da Silva, **Silvia Sellán**, Natalia Pacheco-Tallaj, Justin Solomon
SIGGRAPH 2025

Mesh Simplification for Unfolding
Manas Bhargava, Camille Schreck, Marco Freire, Pierre-Alexandre Hugron, Sylvain Lefebvre, **Silvia Sellán***, Bernd Bickel* (*joint last authors)
Computer Graphics Forum (to be presented at Eurographics 2025)

Mirror Bridges Between Probability Measures
Leticia Mattos Da Silva, **Silvia Sellán**, Francisco Vargas, Justin Solomon
Under Peer Review

Surface-Filling Curve Flows via Implicit Medial Axes
Yuta Noma, **Silvia Sellán**, Nicholas Sharp, Karan Singh, Alec Jacobson
SIGGRAPH 2024

Reach for the Arcs: Reconstructing Surfaces from SDFs via Tangent Points
Silvia Sellán, Yingying Ren, Christopher Batty, Oded Stein
SIGGRAPH 2024

Bayes' Rays: Uncertainty Quantification for Neural Radiance Fields
Lily Goli, Cody Reading, **Silvia Sellán**, Alec Jacobson, Andrea Tagliasacchi
CVPR 2024 (Highlight)

Reach for the Spheres: Tangency-Aware Surface Reconstruction of SDFs
Silvia Sellán, Christopher Batty, Oded Stein
SIGGRAPH Asia 2023

Neural Stochastic Screened Poisson Reconstruction
Silvia Sellán, Alec Jacobson
SIGGRAPH Asia 2023

Constructive Solid Geometry on Neural Signed Distance Fields
Zoë Marschner, **Silvia Sellán**, Hsueh-Ti Derek Liu, Alec Jacobson
SIGGRAPH Asia 2023

Stochastic Poisson Surface Reconstruction
Silvia Sellán, Alec Jacobson
SIGGRAPH Asia 2022

Breaking Bad: A Dataset for Geometric Fracture and Reassembly
Silvia Sellán*, Yun-Chun Chen*, Ziyi Wu*, Animesh Garg, Alec Jacobson (*joint first authors)
NeurIPS 2022 (Spotlight)

Breaking Good: Fracture Modes for Realtime Destruction
Silvia Sellán, Jack Luong, Leticia Mattos Da Silva, Aravind Ramakrishnan, Yuchuan Yang, Alec Jacobson
SIGGRAPH Asia 2022

Sex and Gender in the Computer Graphics Research Literature
Ana Dodik*, **Silvia Sellán***, Amanda Phillips, Theodore Kim
SIGGRAPH Talk 2022

Swept Volumes via Spacetime Numerical Continuation
Silvia Sellán, Noam Aigerman, Alec Jacobson
SIGGRAPH 2021

Opening and Closing Surfaces
Silvia Sellán, Jacob Kesten, Yan Sheng Ang, Alec Jacobson
SIGGRAPH Asia 2020

Developability of Heightfields via Rank Minimization
Silvia Sellán, Noam Aigerman, Alec Jacobson
SIGGRAPH 2020

Solid Geometry Processing on Deconstructed Domains
Silvia Sellán, Herng Yi Cheng, Yuming Ma, Mitchell Dembowski, Alec Jacobson

ACM / Eurographics Symposium on Geometry Processing 2019

Patents

Swept Volume Determination Techniques
Silvia Sellán, Noam Aigerman, Alec Jacobson
United States Patent No. 11810255, 2023

Generating Developable Depth Images Using Rank Minimization
Silvia Sellán, Noam Aigerman, Alec Jacobson
United States Patent No. 11080819, 2021

Software

Gpytoolbox: A Python geometry processing toolbox
Silvia Sellán, Oded Stein
A library of general geometry processing Python research utility functions, including basic procedural meshes, differential geometric operators, bounding volume hierarchies and surface reconstruction from point clouds and SDFs.

Teaching Feedback

Summer Geometry Institute *2021*
During the summer of 2021, I planned, prepared and conducted a 6-hour long tutorial session on the topic of shape representations for undergraduate students of underrepresented communities, as part of MIT's Summer Geometry Institute (SGI). A representative sample of the anonymous feedback collected by professor Justin Solomon about my teaching is reproduced below, each quotation corresponding to different student.

Silvia Sellán's presentation was idyllic, it gave the feeling of being a duck in a pond being fed delicious crumbs of bread, the students being the duck and Silvia the feeder throwing in one after another the information that we like the ducks devoured. The presentation itself was amazing to go beyond analogy it was clear and concise towards learning the topic, the information did not feel too overwhelming, nor too brief. The exercises as well as giving focus upon them and breaking them apart into which to do at what times, they felt like the perfect amount of material in order to have us learn and test our knowledge of the topics.

I just wanted to say that I really enjoyed Silvia's programme. Cutting out all the formulas definitely made her material really accessible and easy to follow without worrying about the precise details of what is going on. I think leaving these details for us to figure out by doing the exercises is really good for developing understanding, rather than having a perhaps more technical talk which is harder to follow and then not quite knowing how to approach the exercises.

Silvia's lecture was the easiest to follow and the most approachable.

Silvia's tutorial: Lively and engaging, I liked how a narrative that tied in everything together neatly was presented.

I really liked Silvia Sellan's tutorial day because for the presentations she gave us a story illustrating the motivation behind the concepts and theory and the actual coding assignments were very accessible and did not require a lot of background material.

I think a very good example of this was Silvia Sellán's tutorial day. She approached the advanced topics from a big picture perspective and all of the coding exercises needed "basic" MATLAB and knowledge of calculus and a small amount of linear algebra.

I thoroughly enjoyed Silvia's talk and the associated exercises.

I also found Silvia's talk very valuable, not only for the geometry processing material offered (which was undoubtedly great, well-structured and very accessible), but also for increasing our awareness about potential nefarious uses of geometry processing. Also the brief digressions on true diversity when talking about fonts/letters were in my opinion very welcome – I (unfortunately) tend to think in a very "westernized" way, and it's always good to bring awareness to things outside of our intellectual comfort zone.

I really liked Silvia Sellán's day of the tutorial week. I think she did a really good job of creating presentations and exercises that met me where I am as a student without a formal experience in geometry processing. The mathematics and computer science that she talked as well as exercises she designed were accessible to me as someone who has undergraduate majors in mathematics and computer science as well as had participated in larger projects with programming computer graphics components. I also think she did a really good job of telling and motivating a story, which was really important to staying engaged throughout the day. I also really appreciate that she spoke about ethics in computing and the need to think critically about academic work. It's definitely something that is not spoken enough about and that needs to be spoken about more.

YOU GUYS ARE WONDERFUL! Not gonna lie, I started looking at PhD opportunities to pursue this field after attending this program.
